

Coach Portal UI Consistency Audit Report

Date: January 14, 2026

Audited Pages: 15 pages in `/app/coach/`

Executive Summary

The coach portal has **significant UI inconsistencies** across pages that affect user experience and brand perception. Key issues include mixed button colors, inconsistent layout wrappers, varying border radii, and different background colors.

● Critical Inconsistencies

1. Layout Wrapper Usage

| Page | Uses CoachLayout | Background |
|-----------------|------------------|---------------------------|
| dashboard | ✗ None | <code>bg-[#0f1419]</code> |
| students | ✗ None | Unknown |
| sessions | ✗ None | <code>bg-gray-900</code> |
| earnings | ✓ CoachLayout | <code>bg-gray-900</code> |
| discovery-calls | ✗ None | <code>bg-[#0f1419]</code> |
| templates | ✓ CoachLayout | <code>bg-gray-900</code> |
| profile | ✗ None | <code>bg-gray-900</code> |

Issue: Only 2 pages use `CoachLayout` component while others handle layout independently.

Impact: Inconsistent padding, margins, and structure.

Fix: Either all pages use CoachLayout OR none do (use `app/coach/layout.tsx` only).

2. Primary CTA Button Colors

| Page | Pink ( #FF0099) | Blue ( #00ABFF) | Dominant |
|--------------|---|---|----------|
| ai-assistant | 5 | 0 | Pink |
| confirm | 4 | 0 | Pink |

| Page | Pink (█ #FF0099) | Blue (█ #00ABFF) | Dominant |
|-----------------|------------------|------------------|---|
| dashboard | 3 | 2 | Pink |
| discovery-calls | 2 | 0 | Pink |
| login | 0 | 2 | Blue |
| onboarding | 5 | 0 | Pink |
| profile | 4 | 0 | Pink |
| sessions | 0 | 8 | Blue ⚠ |
| students | 2 | 2 | Mixed |
| templates | 1 | 0 | Pink |

Issue: Sessions page uses Blue (█ #00ABFF) while all other pages use Pink (█ #FF0099).

Impact: Brand inconsistency - users don't know which color means "primary action".

Fix: Standardize all primary CTAs to Pink (█ #FF0099), secondary to Blue (█ #00ABFF).

3. Loading Spinner Colors

| Page | Color |
|--------------|--|
| Most pages | [text-[#FF0099]] ✓ |
| sessions | [text-[#00ABFF]] ⚠ |
| one instance | [text-pink-500] ⚠ |

Fix: All loading spinners should use [text-[#FF0099]].

4. Card Border Radius

| Page | rounded-2xl | rounded-xl | rounded-lg |
|-----------|-------------|------------|------------|
| dashboard | 7 | 11 | 0 |
| sessions | 4 | 16 | 5 |
| earnings | 0 | 5 | 5 |
| profile | 0 | 6 | 13 |

| Page | rounded-2xl | rounded-xl | rounded-lg |
|----------|-------------|------------|------------|
| students | 2 | 5 | 0 |

Issue: No consistent pattern. Some pages use rounded-2xl for cards, others use rounded-lg.

Fix: Standardize to:

- Cards/Containers: `rounded-2xl`
- Buttons: `rounded-xl`
- Small badges/inputs: `rounded-lg`

5. Max-Width Containers

| Page | Container |
|------------------|------------------------|
| sessions | <code>max-w-7xl</code> |
| profile | <code>max-w-4xl</code> |
| login/onboarding | <code>max-w-md</code> |
| others | Various |

Fix: Dashboard-style pages should use `max-w-7xl mx-auto`.

Medium Inconsistencies

6. Sticky Headers

| Page | Has Sticky Header | Has Backdrop Blur |
|------------|-------------------|-------------------|
| sessions | ✓ | ✓ |
| login | ✗ | ✓ |
| onboarding | ✗ | ✓ |
| others | ✗ | ✗ |

Fix: All main content pages (dashboard, students, sessions, earnings) should have:

7. Text Color Hierarchy

Standard should be:

- Primary text: `text-white`
- Secondary text: `text-gray-400`
- Tertiary/disabled: `text-gray-500`
- Labels: `text-gray-400`

Current issues:

- Some pages mix gray-300, gray-400, gray-500 without clear hierarchy
- dashboard uses gray-300 for items that should be gray-400

8. Input Focus States

Mixed patterns found:

- `focus:border-[#FF0099]` (correct)
- `focus:border-pink-500` (should standardize)
- `focus:ring-[#FF0099]/50` (correct)

Fix: All inputs should use:

css

```
focus:outline-none focus:border-[#FF0099] focus:ring-1 focus:ring-[#FF0099]/50
```

9. Hover Effects

Mixed patterns:

- `hover:bg-gray-700` (cards)
- `hover:bg-gray-600` (buttons)
- `hover:bg-[#FF0099]/90` (primary buttons)
- `hover:scale-110` (icons)

Standard should be:

- Cards: `hover:bg-gray-700/50 transition-colors`
 - Secondary buttons: `hover:bg-gray-600`
 - Primary buttons: `hover:bg-[#FF0099]/90`
-

● Good Patterns (Keep)

1. **Empty States:** Most pages have proper empty state handling ✓
 2. **Loading States:** All pages use Loader2 component ✓
 3. **Page Titles:** Consistently use `text-2xl font-bold text-white` ✓
 4. **Card Borders:** Most use `border border-gray-700` ✓
-
