23-28 min	Parent Practice: coach models "sound time" activity for parent to do at home	Parent skill-building
28-30 min	Goodbye ritual + sticker	Positive closure

Coach Prep Notes: Observe child's ability to isolate sounds. Note if child confuses letter names with sounds (common). Observe parent-child dynamic — is parent correcting or encouraging? Note attention span.

Coach Prep Notes: Rhyme detection is foundational for phonemic awareness. Some 4-year-olds won't get it immediately — that's normal. Note whether child can PRODUCE rhymes or only DETECT them (detection

comes first).

NOTES FOR RUCHA

- Please validate all prerequisite chains** — I've structured them based on general phonics pedagogy, but your 7+ years of Jolly Phonics expertise should override any sequencing I've suggested.
- Materials listed are suggestions** — replace with your actual PhonicSeeds content, books you use, and materials you have access to.
- Timings are flexible** — if a 30-min session has too many activities, cut the weakest one. Better to do 3 activities well than 5 rushed.
- Missing templates you might want to add:**
 - Specific PhonicSeeds-aligned templates
 - Hindi → English code-switching support sessions
 - Fine motor / writing readiness (for Foundation 4-year-olds)
 - Reading Yoga integration sessions
 - Kahani Time follow-up sessions
 - Assessment-only templates (for mid-season check-ins)
- The diagnostic templates (F15/B01/B13/M01/M12) are the most important** — these directly feed rAI. Please ensure the skill dimensions they assess match what you'd actually evaluate.

6. **40 templates ≠ 40 sessions** — rAI will select and sequence from this library. A 24-session Foundation season might use 15-18 unique templates with some repeated at higher difficulty or with different content.
